Best Core Drilling Rig Brand in Sweden 2025: Price List, Quotation & Supplier Deals

Want to buy core drilling rigs in Sweden but confused about prices? You're not alone. Over 78% of contractors here say "unclear costs" and "ROI doubts" slow their purchasing decisions. Let's break down Sweden's top-tier brands, with updated price lists and smart supplier strategies.

Why Sweden's Mining Boom Demands Reliable Rigs

Sweden's mining sector will need 4,000+ new drilling units by 2026. But here's the catch: Using generic rigs can cost 30% more in repairs. Local geology demands rigs that handle hard granite (like the Skelleftea Belt) and icy conditions. That's why Swedish-focused brands like Atlas Copco and Sandvik dominate - they build rigs for this exact environment.

AB DrillTech upgraded to Atlas Copco's Diamec 1320 last year. Result? 43% less downtime and 6-month ROI. Their secret? Buying directly from Sweden-based suppliers during seasonal discount periods (March and October).

Why "Price per Drill Meter" Beats Hourly Rates

Sweden's union rules limit drilling to 6 hours/day. Smart buyers negotiate price per meter contracts: Expect
