With 2026 projects already in planning, smart buyers lock deals early. Here's why you can't afford to wait.

Tungsten prices jumped 34% in Q1 2024, pushing standard drill bit costs to \$180-\$450/piece. But manufacturers now blend cost-cutting tech:

Chinese factories use 3D-printed carbide cores (cuts waste by 25%)

German suppliers recycle used bits into hybrid models

ROI-focused designs last 20% longer per drilling cycle

A Texas contractor saved \$78,000/month switching to price-per-piece deals from Vietnam. Their secret? Buying 2026 stock early at bulk rates.
