

Core Drilling Rig Cost in Norway 2025: Price List, Quotations & Supplier Deals

Core Drilling Rig Cost in Norway 2025: Price List, Quotations & Supplier Deals

Want to know how much a core drilling rig costs in Norway? Whether you're planning geothermal projects or mining operations, prices here are steep - up to EUR150,000+ for high-end rigs. But smart buyers can slash costs by 30% using local incentives. Let's break down 2025 pricing trends, get live quotations, and reveal the best supplier deals.

Why Core Drilling Rigs in Norway Cost 35% More Than Germany

Norway's rugged terrain and strict eco-laws push drilling equipment prices up. A mid-tier rig selling for EUR85,000 in Germany may hit EUR115,000 here. Two main reasons:

- High labor/transport costs (20% added vs. EU average)
- Mandatory emission filters (+EUR8,000-15,000 per rig)

Bergen Drilling AS saved EUR24,000 last year by ordering through state-approved wholesale programs. More on that later.

2025 Price List: From Entry-Level to Industrial Rigs

Typical core drilling rig prices in Norway (including 25% VAT):

- Portable models (100m depth): EUR28,000-45,000
- Diesel-powered rigs (500m): EUR74,000-92,000
- Deep-hole automated units: EUR128,000-167,000

Compare this to China-made imports at 40% lower cost, but watch for 19% customs duties. Many opt for EU-built models with 10-year warranties.

How to Get Tax Rebates & Cut Your ROI Time

Norway's Green Infrastructure Fund offers 15% cashback on rigs used in renewable projects. Oslo contractor Geopower AS combined this with bulk supplier discounts to cut EUR109,000 rigs to EUR82,000. Three steps to save:

- Submit project plans to Enova (state energy agency)
- Choose NCCS-certified rigs (extra 8% rebate)
- Negotiate with Nordic suppliers like Sandvik or Epiroc

Case Study: Getting Multiple Quotations in 48 Hours

Trondheim Minerals needed six rigs fast for a nickel mine. By using platforms like Kompass Norway, they

compared 14 price per piece offers and saved EUR216,000. Key moves:

- o Requested emergency delivery clauses
- o Pitched EU suppliers against Asian rivals
- o Locked in December 2024 prices before 8% tariff hikes

Top suppliers now offer 0% financing for rigs ordered before Q3 2025. Need a buying guide tailored to Norwegian conditions? Reach certified brokers at Nordmek or check our live cost calculator below. Prices update hourly based on steel rates and inventory.
