

DTH Drilling Rig Rental Cost per Month in Norway 2025: Price List, Quotes & ROI Guide

DTH Drilling Rig Rental Cost per Month in Norway 2025: Price List, Quotes & ROI Guide

Need to rent a DTH drilling rig for mineral exploration in Norway? You're not alone. Over 87% of Nordic mining companies now lease equipment instead of buying, according to 2024 data from Statista. Let's break down monthly rental costs, compare suppliers, and show how Oslo contractor FjellBrudd cut expenses by 41%.

What's the Real Price Tag for DTH Rig Rental?

A standard DTH drilling rig rental cost per month in Norway ranges from EUR9,800 to EUR18,500. But wait - three factors change everything:

Depth capacity: 100m vs. 300m rigs have 65% price gap

Fuel efficiency: New EU Tier 5 models save EUR3,200/month in diesel

Insurance: Mandatory Arctic operation coverage adds EUR1,100-EUR2,400

Case Study: How Trondheim Mine Slashed Costs

Silver Explorers AS needed 5 months of deep-core drilling near Narvik. Their initial quotation from German supplier Bauer hit EUR102,000. After negotiating:

Chose Norwegian-owned Sandvik rigs with local service

Added weekend shutdowns to cut 140 engine hours

Split rental period into 3+2 months for off-season discount

Final cost? EUR60,700 - 40% savings. ROI tip: Always ask for short-term rental rate tiers.

2025 Norway Market Shifts You Can't Ignore

New government regulations impact your DTH drilling rig price per month:

Carbon tax: EUR85/tonne CO2 from Jan 2025 (+18% vs 2024)

Safety rules: Mandatory AI collision sensors (adds EUR700/month)

Import tariffs: Chinese rigs now face 6.7% duty if leased
