

DTH Drilling Rig Rental Cost per Month in Sweden 2025: Price List, Quotation & Supplier Deals

DTH Drilling Rig Rental Cost per Month in Sweden 2025: Price List, Quotation & Supplier Deals

Need a DTH drilling rig for your next project in Sweden? You're not alone. Construction and mining companies across Scandinavia face the same challenge: high upfront costs for specialized equipment. Let's break down rental costs per month, smart sourcing strategies, and how to maximize ROI.

Why Rent a DTH Drilling Rig in Sweden?

Sweden's booming infrastructure projects - from tunnel expansions to geothermal energy - demand DTH (Down-The-Hole) rigs. But buying one outright? Most contractors can't justify EUR250,000-EUR500,000+ for new gear. That's where monthly rental deals shine.

Current Rental Market Trends

Data from Nordic Equipment Hub (2024) shows:

- Basic DTH rigs rent for EUR3,800-EUR5,200/month in Sweden
- High-capacity models cost EUR6,500-EUR9,000/month
- 20% surge in demand since 2023 (due to EU green energy incentives)

What Impacts Your DTH Rig Rental Cost?

Three factors rule your monthly price in Sweden:

- Depth capacity: 100m rigs = 35% cheaper than 300m+ models
- Fuel efficiency: Tier 4 engines save 15-20% on operating costs
- Contract length: 6-month leases get 8-12% discounts vs short-term

Case Study: Gothenburg Tunnel Project

ABB Construction saved EUR73,000 by renting two Atlas Copco FlexiROC DTH rigs for 8 months instead of buying. Their secret? A fixed-price quotation covering maintenance and operator training.

How to Find the Best Deals in Sweden

Top local suppliers like Swepac and Epiroc Sweden offer price-match guarantees. But watch for hidden fees: Pro tip: Ask if "price per month" includes:

- Transport to/from site
- Drill bit replacements
- Emergency repair coverage

Regional Price Comparison (Monthly Rental)

Sweden averages 5-10% lower costs than Germany but 12-15% higher than Poland. For cross-border projects in Norway/Denmark, Swedish suppliers often waive transport fees.
