

# DTH Drilling Rig Supplier in Chile 2025: Cost, Price List & Verified Wholesale Deals

## DTH Drilling Rig Supplier in Chile 2025: Cost, Price List & Verified Wholesale Deals

Are you battling high operational costs from outdated drilling equipment in Chile's mining sector? You're not alone. Over 62% of mining companies here still use rigs older than 10 years, according to the National Mining Society. Let's explore how partnering with the right DTH drilling rig supplier in Chile can slash your downtime by 40% and boost ROI within 18 months.

### Why Chile's Miners Are Switching to Modern DTH Rigs

Copper production - Chile's \$31 billion crown jewel - requires precision drilling in hard rock formations. Traditional methods struggle with the Andean region's abrasive granite layers, often causing:

50% higher bit replacement costs

3-week delays per equipment failure

12% lower ore recovery rates

### Case Study: Codelco's 2023 Productivity Leap

Chile's state-owned mining giant upgraded 18 rigs through Sinotech Drilling Solutions, a China-based supplier with local Santiago offices. Results?

Key metrics improved:

- Drill speed: +55%

- Maintenance costs: -38%

- Project completion: 7 months faster

### What Top DTH Rig Suppliers Offer in 2025

Leading DTH drilling rig suppliers in Chile now provide:

Customized price per piece models for 100-400mm boreholes

Hybrid diesel-electric systems cutting fuel costs by 29%

Local inventory with same-day spare parts delivery

### Decoding the Price List: New vs Refurbished

A brand-new 300m depth DTH rig from Germany's Boart Longyear costs \$185,000-\$220,000. But Chinese suppliers like Siton Machinery offer comparable models at \$122,000-\$155,000 - with 3-year onsite warranties. Refurbished units (40% cheaper) work best for short-term contracts under 2 years.

### How to Get Instant Quotes from Suppliers

Follow this buying guide to secure the best deal:

## **DTH Drilling Rig Supplier in Chile 2025: Cost, Price List & Verified Wholesale Deals**

1. Share project specs (depth, rock hardness, shift duration)
2. Compare 3+ price quotations
3. Verify supplier certifications (ISO 9001, CE, Chile's SEC approval)
4. Negotiate payment terms - most firms accept 30% advance now

Pro Tip: Ask about Chile's Decree 66/2024 - drilling equipment purchased before June 2025 qualifies for 15% tax rebates if meeting Tier-4 emission standards.

Need a reliable partner today? Contact DRC Equipment in Antofagasta - their WhatsApp quote service delivers customized DTH rig pricing within 4 hours, complete with ROI projections for your specific mine site.
