

Diesel Generator Price in Pakistan 2024: Cost per kWh, Quotation & Supplier Deals

Diesel Generator Price in Pakistan 2024: Cost per kWh, Quotation & Supplier Deals

Looking for diesel generator cost in Pakistan? You're not alone. Power outages cost businesses up to \$18B annually here, and over 65% of SMEs now rely on backup generators. But prices vary wildly - from Rs300,000 to Rs4.5M. Let's cut through the confusion and find real 2024 pricing trends.

Why Diesel Generator Prices in Pakistan Keep Changing

Three things are reshaping the market:

Dollar rate jumps: Imported brands like Cummins and Kirloskar now cost 22% more than 2022

China's cheap models: Made-in-China generators under Rs500k now control 40% of Karachi's market

New taxes: The 18% GST on industrial models above 500kVA

A Lahore Restaurant Owner's Story

Ahmed bought a 150kVA generator for Rs1.2M in 2023. His monthly fuel cost? Rs78,000. After calculating price per kWh (Rs35 vs K-Electric's Rs50), he broke even in 14 months. Now he's expanding with three 75kVA units from a Lahore wholesale dealer.

2024 Diesel Generator Price List

Here's what's trending across Lahore, Karachi, and Islamabad:

Portable 10kVA: Rs320,000-Rs470,000 (Chinese vs Japanese)

Industrial 500kVA: Rs3.9M-Rs4.8M (German tech like Deutz saves 8% in fuel)

Silent canopy type: Add Rs130,000-Rs300,000 to base cost

How to Get the Best Quotation

Top suppliers like Rahim Power and Chenab offer package deals. Last month, a Faisalabad textile mill negotiated:

2x 250kVA generators = Rs7.2M

Free maintenance for 1 year (worth Rs240k)

Fuel efficiency warranty

Don't Miss the ROI Window

The State Bank predicts 6% inflation for machinery in 2024-25. Yet renewable energy policies might cut generator demand by 2030. Right now? Dealers in Port Qasim are clearing 2023 stock at 15% discounts. Ask

Diesel Generator Price in Pakistan 2024: Cost per kWh, Quotation & Supplier Deals

for wholesale guide rates if buying multiple units - group purchases with neighbors can save 18% on delivery.

Karachi's TechSol Engineering just ordered six 100kVA Chinese hybrids (diesel + solar compatible) at Rs2.3M each. Their secret? Paying 70% upfront to lock 2023 pricing before the rupee dipped again. With supplier deals shifting weekly, timing is your profit lever.
