

Drilling Bit Price in Jordan 2025: Cost per Piece, Quotation & Buying Guide

Drilling Bit Price in Jordan 2025: Cost per Piece, Quotation & Buying Guide

Need to know how much drilling bits cost in Jordan? Whether you're digging water wells or mining, the right drill bit impacts your project's success - and budget. Let's break down the price per piece, compare suppliers, and show how to get the best value.

What's the Average Drilling Bit Cost in Jordan?

Prices range from \$15 to \$450+ per piece in 2025, depending on type:

Tricone Bits: \$250-\$450 (oil/gas drilling)

PDC Bits: \$150-\$380 (hard rock formations)

Auger Bits: \$15-\$80 (shallow wells)

Jordan's mining industry grew 6.3% last year (Central Bank of Jordan), boosting demand for durable bits. Local suppliers like Petra Drilling Tools and imports from China (which controls 35% of global drill bit production) dominate the market.

Why Prices Vary Wildly

Hussam Drilling Company in Amman cut project delays by 40% after switching to German-made tungsten carbide bits (\$320/piece). Though costlier upfront, they lasted 3x longer than Chinese alternatives (\$110-\$180).

How to Get Accurate Quotations Fast

Most Jordanian buyers overpay by 15-20% due to:

Hidden customs fees on imports

Outdated price lists from local vendors

Wrong bit size/material for their projects

Pro tip: Ask for EXW (Ex-Works) pricing from China-based suppliers like SINOCOREDRIILL. Their wholesale deals start at \$14.70/unit for 100+ auger bit orders - no middlemen.

5 Steps to Buy Drilling Bits Smartly

1. Test 2-3 samples in your terrain (Jordan's limestone requires different bits vs. sand)
2. Compare ROI: A \$400 bit that drills 2,000 meters beats a \$250 bit needing 4 replacements
3. Check certifications: ISO 9001 bits last 22% longer (Aqaba Port Authority 2024 report)
4. Negotiate bulk discounts: Most suppliers offer 8-12% off for 50+ units
5. Use Jordan's 5% VAT exemption for industrial equipment imports

Drilling Bit Price in Jordan 2025: Cost per Piece, Quotation & Buying Guide

Local supplier Arabian Horizons now offers free bit recycling - return worn tools for 7% credit on new orders. Prices may rise 5-8% later in 2025 as steel costs climb. Get quotes locked in this quarter.
