

# Drilling Rod Cost in India 2024: Price List, Supplier Deals & ROI Guide

## Drilling Rod Cost in India 2024: Price List, Supplier Deals & ROI Guide

If you're asking "how much does a drilling rod cost in India?", you're likely caught between tight budgets and the need for reliable equipment. Prices swing wildly here - from INR800/meter for basic rods to INR3,000/meter for imported alloy versions. But why the confusion? Let's cut through the noise.

### Why Drilling Rod Prices Vary 300% in India

Last month, a Hyderabad mine operator paid INR2.3 lakh for 100 meters of German-made rods - only to discover identical-performance Chinese rods at INR1.8 lakh. Three factors dominate drilling rod costs:

Material: Local MS steel (INR800-1,200/m) vs. imported tungsten carbide (INR2,500-3,000/m)

Tariffs: 18% GST + 7-12% import duty on foreign rods

Demand surge: India's INR12,000 crore mineral exploration push

### Real-World Pricing: What Suppliers Won't Tell You

Take Mumbai-based GeoDrill Corp's 2024 rate card:

Basic 6m rods: INR5,400/piece (domestic)

Threaded EU rods: INR18,000/piece

China-made kits: INR1.25 lakh for 100m (FOB)

### Smart Buying: Slash Costs Without Sacrificing Quality

Ahmedabad's Tirth Construction saved INR4.7 lakh/year by mixing local and Chinese rods. Their strategy:

Used Indian rods (INR1,100/m) for shallow 50m wells

Switched to tariff-exempt ASEAN imports (INR1,600/m) for 150m+ projects

"Always demand test certificates - 60% of 'imported' rods are repacked local stock." - Rakesh Mehta, Bharat Drill Tools CEO

### 2024 Market Shock: China Dumping 30% Cheaper Rods

Chinese suppliers like Siton Machinery now offer INR950/m FOB prices. But add 25% for logistics/duties - still 18% below Indian rates. However, Delhi's new BIS certification (IS 4434:2023) blocks uncertified imports since January.

Your move? Partner with GST-registered suppliers offering 5-year warranties. Top performers like Volgaus India even provide free drill-bit pairing services. For high-ROI projects, consider leasing options at

INR300-500/meter/day.

Now armed with 2024 price benchmarks and sourcing hacks, compare quotes from at least 3 suppliers. Remember: A INR500/m difference becomes INR5 lakh extra on 1,000m projects - enough to buy a backup compressor.
