## Why Rent Drilling Rods in Taiwan?

Taiwan's construction boom is real - the government plans to invest \$23 billion in urban development and offshore wind projects by 2026. But buying drilling rods outright? That means spending \$8,000-\$15,000 per piece. Here's the smart alternative:

- Monthly rental costs start at \$400/rod for standard models
- Zero maintenance fees at major suppliers like Taiwan Rentals Co.
- Free replacement guarantee if rods break onsite

## The Hidden Cost Trap (And How to Dodge It)

Last year, a Kaohsiung contractor lost \$12,000 by choosing the cheapest drilling rod quote. The rods broke mid-project, causing 3 weeks of delays. Moral? Price per piece matters, but supplier reliability matters more.
