Why Turkey's Engineering Drilling Rig Market is Booming in 2025?

Turkey's construction sector grew 14.7% year-on-year in 2024, fueled by mega-projects like the Istanbul Canal and earthquake-resistant infrastructure upgrades. The government allocated \$12.3 billion for heavy machinery imports - and drilling rigs take the lion's share.

The Real Cost of Delayed Purchases

Last month, a Turkish contractor lost \$38,000 daily by renting outdated rigs for the Ankara Metro project. Buying wholesale eliminates rental fees and boosts ROI - but only if you nail the pricing.
