

Four Wheel Screw Diesel Compressor Price in Pakistan 2025: Cost Guide, Quotations & Supplier Deals

Four Wheel Screw Diesel Compressor Price in Pakistan 2025: Cost Guide, Quotations & Supplier Deals

Need a four wheel screw diesel compressor for construction or mining? You're not alone. Over 72% of Pakistani contractors now prefer mobile diesel compressors over stationary units. But here's the problem: prices vary wildly from Rs 1.8 million to Rs 3.5 million. Let's cut through the confusion.

Why Pakistan's Demand for Mobile Compressors Is Surging

Pakistan's infrastructure projects grew 14% last year, driving demand for portable diesel compressors. Chinese suppliers like Sullair and Atlas Copco now control 68% of this market through Karachi ports. But cost in Pakistan depends on three factors:

Horsepower (15HP-30HP models dominate)

Tank capacity (500L-1,000L options)

Fuel efficiency (New EU Stage V engines cost 18% more)

Current Price Ranges: Rawalpindi vs Import Deals

A local dealer in Lahore quotes Rs 2.4 million for a 20HP unit. But here's a shocker: the same four wheel screw diesel compressor costs Rs 1.9 million when imported from China. Proof? Shahbaz Enterprises saved Rs 650,000 on 3 units using Gwadar Port clearance.

How to Get Accurate Quotations Without Getting Scammed

Follow this 3-step buying guide:

Verify CE/ISO certifications - 45% of "new" units are refurbished

Compare free maintenance periods (6-24 months)

Check air delivery (CFM) against project needs

A Peshawar buyer recently overpaid Rs 420,000 for an underpowered unit. Don't repeat this! Reliable suppliers like KAESER (Germany) offer lifetime ROI calculators online.

Supplier Showdown: Chinese vs Japanese Models

While Japanese screw diesel compressors last 8-10 years, Chinese alternatives now offer 5-year warranties at 40% lower prices. The sweet spot? Shanghai Heavy Machinery's hybrid models with German bearings. Their latest 25HP unit sold 57 pieces through Karachi in Q1 2025.

Four Wheel Screw Diesel Compressor Price in Pakistan 2025: Cost Guide, Quotations & Supplier Deals

Need a ballpark figure? Price per piece starts at Rs 1.75 million for basic models, hitting Rs 2.9 million for 300CFM+ industrial units. Pro tip: Request FOB prices directly from Qingdao factories to bypass middlemen.

Last month, Frontier Constructions saved 22% by bulk-ordering 5 units through a Lahore wholesale agent. The catch? You'll need 15-20 days for customs clearance. Ready to crunch numbers? Use our free compressor sizing tool below before contacting suppliers.
