

# Four Wheel Screw Diesel Compressor Rental Cost per Month Norway: 2025 Price List, Quotation & Supplier Deals

Four Wheel Screw Diesel Compressor Rental Cost per Month Norway: 2025 Price List, Quotation & Supplier Deals

Why Construction Teams in Norway Are Renting Mobile Compressors

Need reliable airpower for remote sites in Norway? Four wheel screw diesel compressors solve a big problem. Construction and mining projects here face harsh Arctic weather, limited grid power, and strict noise regulations. Buying one outright? You'll spend 500,000-800,000 NOK (\$45,000-\$72,000) upfront. That's why over 63% of Norwegian contractors now rent diesel compressors monthly instead.

The Math: Rental Costs vs. Buying

Here's a breakdown for a mid-sized compressor (10-15 bar, 5.5-7.5 m<sup>3</sup>/min):

Purchase price: 620,000 NOK + 25% VAT

Monthly rental cost: 18,000-25,000 NOK (includes delivery, maintenance)

Stats from Nordic Rental Market Report 2024 show businesses save 30-40% annually by renting. "We used rental units for a 9-month tunnel project near Tromsø," says Lars Berg, Oslo-based project manager. "Saved 270,000 NOK vs buying - and avoided resale hassles."

Norway's 2025 Price Trends & Hidden Fees

Demand for mobile diesel compressors in Norway grew 12% last year. But watch out:

Fuel surcharges: 8-15 NOK/liter extra if diesel prices spike

Winter premium: +10% fee for -20°C operation kits

Delivery cost: 1,500-4,000 NOK for remote sites

Top suppliers like Atlas Copco Norway and local Nordic Rentals now offer "fixed monthly quotes" to lock in rates. For a 2025 hydro dam project in Sogn og Fjordane, one contractor secured a 22,500 NOK/month deal - 15% below market average.

How to Get the Best Diesel Compressor Rental Deals

Three steps to save:

Compare supplier fuel policies: Rent from companies using Tier 4 engines (cut diesel use by 40%).

Ask about government incentives: Norway's NOx Fund offers up to 30% rebates for low-emission equipment.

Bundle services: Companies like Sandvik provide compressor+generator packages at 18% discount.

## Real-World Example: Offshore Wind Farm Savings

When building the Hywind Tampen floating turbines, a team rented six 4-wheel diesel compressors for 14 months. By negotiating volume pricing and emission rebates, they paid 21,200 NOK/month per unit - total savings of 356,160 NOK vs standard rates. Smart rental choices funded their crane hire budget.

Norwegian suppliers typically respond to rental cost inquiries within 4 business hours. For urgent projects near Bergen or Kirkenes, same-day deployment is possible if booked before 10 AM. Always check compressor availability 6-8 weeks ahead during peak summer construction months.
