Jordan's construction and manufacturing sectors grew by 4.7% last year (Jordan Industrial Chamber, 2023), driving demand for reliable industrial tools. But many businesses struggle to find affordable, high-performance compressors. Let's fix that.

### Why Piston Electric Compressors Dominate Jordan's Market

Over 60% of small workshops in Amman now use piston electric air compressors instead of diesel models. Why? Lower upfront costs (starting at \$180 per unit) and 30% energy savings compared to older systems. Take Nasir & Sons Garage - after switching to a Chinese-made piston compressor, their monthly electricity bills dropped from \$450 to \$290.

### The Hidden Costs of Choosing the Wrong Supplier

Most buyers focus only on price per piece, but poor-quality compressors can cost you more:

- Frequent breakdowns (2-3x repair costs/year)
