

Second Hand Air Tank Price in Argentina 2024: Cost, Quotation & Buying Guide

Second Hand Air Tank Price in Argentina 2024: Cost, Quotation & Buying Guide

Need affordable industrial equipment? Second hand air tank prices in Argentina have dropped 18% since 2022, making now the best time to buy. We'll show you current market rates, trusted suppliers, and how to avoid costly mistakes.

Why Argentina's Used Air Tank Market Is Booming

Over 4,000 factories in Buenos Aires and Cordoba now use pre-owned compressed air systems to cut costs. The national used industrial equipment market grew 27% year-over-year (Argentine Industrial Chamber, 2023), driven by:

Electricity costs up 54% since 2021

New import taxes on machinery (up to 35%)

Shortage of local manufacturers

Real Price Examples From Buenos Aires Suppliers

A construction company saved \$12,000 USD buying a second hand 500L air tank from China via MercadoLibre Argentina. Current average prices:

200L tanks: ARS 580,000 (\$650 USD)

500L tanks: ARS 1.2M (\$1,340 USD)

1000L industrial units: ARS 2.8M+ (\$3,100 USD)

3-Step Buying Guide for Used Air Tanks

Problem: 63% of buyers report leaks or faulty pressure gauges in untested units. Here's how to shop smart:

1. Verify Supplier Credentials

Top-rated sellers like Compresores Usados Cordoba offer 90-day warranties - rare in Argentina's fragmented market. Always check:

- Chamber of Commerce registration
- Customer reviews on OLX/MLA
- Third-party inspection reports

2. Calculate True ROI

A \$1,000 USD used air compressor saves 70% vs. new models, but factor in:

- Replacement parts availability (China vs EU components)
- Local technician fees (\$30-50 USD/hour)

Second Hand Air Tank Price in Argentina 2024: Cost, Quotation & Buying Guide

- Energy efficiency ratings

3. Negotiate Like a Pro

Argentine sellers expect 15-20% price haggling. Time your purchase for end-of-month quotas. Use competitor quotes as leverage - especially from MercadoLibre's 1,200+ listings.

Supplier Comparison: Local vs Imported Units

While Chinese imports dominate (68% market share), Rosario-based PROAIR offers reconditioned Atlas Copco tanks with 6-month service plans. Key differences:

Price per piece:

Imported 500L tank: \$1,200-1,500 USD

Local reconditioned: \$1,600-1,900 USD

Delivery time:

Sea freight from China: 45-60 days

Local pickup: 2-7 days

Most buyers opt for imports despite wait times - but inspect pressure vessel certifications carefully. The National Gas Regulatory Agency fined 23 companies in 2023 for non-compliant tanks.

Ready to compare second hand air tank prices in Argentina? Contact verified suppliers through IndustriaHoy's marketplace for instant quotations. Deals updated daily - tanks sell fast during harvest season!
