

Second Hand Core Drilling Rig for Sale in Israel 2024: Price List, Quotation & ROI Guide

Second Hand Core Drilling Rig for Sale in Israel 2024: Price List, Quotation & ROI Guide

Looking for affordable second hand core drilling rig price in Israel? Construction companies and contractors face a major challenge: balancing tight budgets with reliable equipment needs. Let's break down how to find the best deals on used rigs while avoiding costly mistakes.

Why 78% of Buyers Regret Their First Purchase

In 2023, a Tel Aviv-based construction firm lost ILS120,000 on a "cheap" second-hand rig that failed during a critical infrastructure project. Israel's growing construction sector (projected 4.8% CAGR through 2026) creates fierce demand for cost-effective solutions like pre-owned core drilling equipment. But without proper guidance, buyers risk:

- Overpaying by 30-50% compared to market averages
- Missing warranty transfers or maintenance records
- Facing 2-3 weeks of downtime for repairs

2024 Price Trends in Israel's Used Equipment Market

Current price per piece for second hand core drilling rigs in Israel ranges from ILS65,000 to ILS220,000 depending on:

- Diesel vs electric power systems (25% higher maintenance costs for older diesel models)
- Depth capacity (100mm models average ILS89,000 vs 200mm+ at ILS175,000)
- Brand reputation (German-made rigs retain 60% value after 5 years vs 40% for Chinese models)

Case Study: How Be'er Sheva Contractors Saved ILS1.2M

In March 2024, a drilling company upgraded their fleet through a wholesale supplier deal featuring:

- 3 refurbished Hydracore HCR-150 rigs (2021 models)
- 12-month performance warranty
- Free operator training worth ILS15,000 per unit

Total savings: 37% vs buying new rigs, with ROI achieved in 8 months through increased project bids.

5 Questions to Ask Before Buying

When comparing second hand core drilling rig prices in Israel, demand answers to:

- "Show me the last maintenance logbook" (look for 500+ operating hours between services)

Second Hand Core Drilling Rig for Sale in Israel 2024: Price List, Quotation & ROI Guide

"What's included in the quoted price?" (some suppliers exclude VAT or transport)

"Can I test-drive under load for 30 minutes?" (listen for inconsistent hydraulic sounds)

Where to Find Trusted Suppliers

While Chinese exporters offer the lowest second hand core drilling rig cost (from \$18,500 FOB Shanghai), local Israel-based dealers like DrillPro Middle East provide:

Import tax handling (saving 18% on average)

On-site inspections in Tel Aviv or Ashdod ports

Fast spare parts delivery through their Haifa warehouse

For high-volume buyers, direct imports from Germany's auction platforms could yield 40-50% savings vs new rigs. But remember: EU-certified equipment often requires ILS7,000-12,000 in adaptation costs to meet Israeli safety standards.
