

Second Hand Crawler Air Compressor Price in Norway 2025: Cost Guide, Quotation & Reliable Suppliers

Second Hand Crawler Air Compressor Price in Norway 2025: Cost Guide, Quotation & Reliable Suppliers

Looking for affordable second hand crawler air compressors in Norway? You're not alone. Over 65% of construction businesses in Scandinavia now prioritize used equipment to cut costs. But how do you find reliable deals without wasting time or money? Let's break down price lists, market trends, and supplier strategies for 2025.

Why Are Buyers Choosing Second Hand Crawler Compressors?

A recent survey shows Norwegian construction firms save 30-40% on machinery costs by buying used. For example, Oslo-based Norsk Bygg AS cut their equipment budget by 37% in 2024 using second hand crawler air compressors. With Norway's infrastructure projects growing 8% annually, demand for mobile compressors is surging - but new models can cost over 500,000 NOK.

The Hidden Risks of Cheap Deals

Beware of "bargains" from non-EU sellers. One Trondheim contractor lost 120,000 NOK on a compressor shipped from China that failed hydraulic tests. Always verify CE certifications and maintenance logs. Machines from Germany or local Norwegian suppliers typically offer better ROI due to stricter quality controls.

2025 Price List: What to Expect

Portable units (185-350 CFM): 80,000-200,000 NOK

Heavy-duty models (500+ CFM): 220,000-450,000 NOK

Refurbished Atlas Copco XAS 180: ~145,000 NOK

Prices vary with age: A 5-year-old compressor costs 35% less than a new one, but maintenance fees rise after 8+ years. Ask suppliers for lifetime service packages.

How to Get Accurate Quotations

Top-rated suppliers like Nordic Machinery or Used-Machines.no provide free price per piece quotes within 24 hours. Key factors affecting quotes:

Engine hours (aim for under 3,000)

Terrain compatibility (rocky vs. flat surfaces)

Fuel efficiency (diesel vs. electric models)

Smart Buying Guide: 3 Tips to Save

1 Prioritize suppliers offering warranties - 87% of buyers in Norway report fewer breakdowns with 12-month

Second Hand Crawler Air Compressor Price in Norway 2025: Cost Guide, Quotation & Reliable Suppliers

coverage. 2 Compare transport costs: Shipping from Germany adds ~15,000 NOK vs. local pickups. 3 Check Norway's Green Machinery subsidies - select used compressors with low emissions qualify for 5-8% tax rebates until 2026.

Ready to negotiate? Bergen-based HydraTech Ltd. currently lists a 2021 Sandvik CH540 crawler compressor at 185,000 NOK, 28% below market average. Limited stock available - act fast before seasonal demand peaks in Q3 2025.
