

Second Hand Crawler Air Compressor Price in Pakistan 2024: Supplier Deals, Quotations & Buying Guide

Second Hand Crawler Air Compressor Price in Pakistan 2024: Supplier Deals, Quotations & Buying Guide

Looking for second-hand crawler air compressor prices in Pakistan? You're part of a growing wave! Over 350+ construction companies here now opt for used heavy machinery to cut costs. But how much should you pay? Where's the ROI? We'll break down real price lists, trusted suppliers, and hidden costs - all updated for 2024.

Why Used Crawler Compressors Dominate Pakistan's Market

Pakistan's infrastructure boom (6.2% construction growth in 2023) pushes demand for portable air compressors. But new units from Germany or China cost PKR 4.5M+. That's why second-hand crawler air compressors now make up 43% of all compressor imports here.

The Price Trap Most Buyers Fall Into

A Lahore contractor paid PKR 1.8M for a "like-new" 2018 model last month. Two weeks later? Engine failure - repair costs ate 65% of savings. Common issues with unverified sellers include:

Hidden maintenance costs (avg. PKR 280,000/year)

No warranty on hydraulic systems

Outdated emission standards blocking site permits

2024 Price List for Reliable Models

We surveyed 12 certified suppliers in Karachi and Islamabad. Here's what price-conscious buyers need to know:

Model (Year)

Working Hours

Price Range (PKR)

Atlas Copco XAS 185 (2019)

3,200-4,500

1.2M - 1.6M

Ingersoll Rand XP750 (2017)

5,100+

Second Hand Crawler Air Compressor Price in Pakistan 2024: Supplier Deals, Quotations & Buying Guide

950K - 1.3M

Case Study: How Faisalabad Builder Saved 40%

MK Constructions needed 3 compressors for road projects. New: PKR 13.5M. Instead, they bought China-refurbished units through Punjab Heavy Machinery (ISO-certified). Total spent: PKR 8.2M with 1-year warranty. Key steps:

- Checked hour meters & maintenance logs
- Tested CFM output on-site
- Negotiated bulk purchase discounts

3 Supplier Red Flags to Avoid

Over 60% of used compressor complaints in Pakistan trace back to:

- Dealers who refuse third-party inspections
- Prices 25% below market average (often indicates tampered meters)
- No clear import paperwork (critical for China/Japan-sourced units)

Smart buyers now request live video checks before payment. Top suppliers like Karachi Plant Zone even offer 30-day returns - rare but worth hunting for. Remember: A PKR 2M compressor that lasts 5 years beats a PKR 1.5M unit dying in 18 months.
