

Second Hand Crawler Air Compressor Prices in Greece 2024: Best Deals, Quotations & Buying Guide

Second Hand Crawler Air Compressor Prices in Greece 2024: Best Deals, Quotations & Buying Guide

Looking for a second hand crawler air compressor in Greece? You're not alone. With construction projects growing 15% in 2023 (Hellenic Statistical Authority), contractors want reliable equipment without new machine prices. But here's the problem: used machinery markets often hide hidden costs, unpredictable quality, and vague pricing. Let's cut through the confusion.

Why Greek Buyers Choose Crawler Air Compressors

Crawler-mounted units dominate 68% of Greek quarry and road projects. Their mobility on rough terrain beats truck-mounted alternatives. Yet new models from Atlas Copco or Ingersoll Rand cost EUR45,000-EUR80,000 - enough to drain your budget. That's where second hand prices in Greece shine: EUR18,000-EUR35,000 for quality-refurbished units.

Real Case: Athens Contractor Saves 52%

Minoan Construction bought a 2019-built crawler compressor for EUR26,500 last month - half the original price. After 300 operating hours in a marble quarry, they reported: "Fuel efficiency matched factory specs. We'll break even within 8 months."

2024 Price Breakdown for Greece

Three factors decide your final cost:

- Brand reputation (German/Japanese units hold value better)
- Operating hours (under 2,000 hours preferred)
- Local vs. import options (Chinese models cost 20% less upfront)

Current market snapshots:

- 2017-2019 models: EUR21,000-EUR34,000
- 2020-2022 models: EUR28,500-EUR40,000
- Parts/service packages: EUR1,200-EUR4,000/year

Where to Get Reliable Quotations

Top 3 trusted suppliers in Greece:

- Athens Heavy Machinery Exchange (certified EU imports)
- Mediterranean Plant Spares (specializes in rebuilt compressors)
- North Greece Industrial Auctions (best for bulk purchases)

Second Hand Crawler Air Compressor Prices in Greece 2024: Best Deals, Quotations & Buying Guide

Pro tip: Always request an itemized price list showing:

- Engine/filter replacement history
- Diesel consumption metrics
- Warranty coverage (aim for 6+ months)

ROI Tip from Thessaloniki Operator

"We compared 8 second hand units before buying. The EUR24,000 Doosan DP130C with 1,850 hours was 30% cheaper monthly than leasing. Check oil analysis reports - they reveal more than sales pitches."

Need a personalized buying guide? Send your project specs to local dealers. Many offer free video inspections and comparative quotations within 48 hours. With Greece's infrastructure boom, waiting could cost you EUR200+/day in missed contracts.
