

Second Hand DTH Drilling Rig Price in Denmark 2025: Cost List, Quotation & Supplier Deals

Second Hand DTH Drilling Rig Price in Denmark 2025: Cost List, Quotation & Supplier Deals

Looking for second-hand DTH drilling rigs in Denmark but worried about prices, quality, or hidden costs? You're not alone. Over 65% of construction companies in Scandinavia now buy used equipment to cut costs, and Denmark's mining sector alone grew 8% last year. Let's break down how to get the best value for DTH rig prices in today's market.

Why Second-Hand DTH Rigs Are Booming in Denmark

Denmark's focus on geothermal energy and infrastructure projects has spiked demand for drilling equipment. But new rigs cost EUR250,000-EUR450,000 - too steep for many contractors. That's why used DTH rigs now dominate 40% of local equipment sales. A 2024 market report shows:

Average price per piece for used rigs: EUR80,000-EUR180,000 (50-60% cheaper than new)

Top-selling brands: Sandvik, Atlas Copco, and Chinese-made Sinosteel rigs (25% lower cost)

How to Avoid Costly Mistakes When Buying Used

Last year, a Copenhagen contractor bought a "lightly used" rig from Germany only to spend EUR26,000 on engine repairs. To avoid this:

Always request third-party inspection reports (look for under 3,000 operating hours)

Compare quotations from 3+ suppliers - prices vary 30% across EU markets

Check if rigs meet Denmark's noise (
