

Second Hand DTH Drilling Rig for Sale in Chile: 2024 Price List, Quotes & Buying Guide

Second Hand DTH Drilling Rig for Sale in Chile: 2024 Price List, Quotes & Buying Guide

Looking for second hand DTH drilling rig price in Chile? You're not alone. With copper mining booming and construction projects expanding across Chile, demand for cost-effective drilling solutions has skyrocketed. But here's the problem: brand-new rigs can cost \$200,000-\$500,000 USD, while older models often lack warranty support. Let's cut through the noise and reveal how to buy used DTH rigs safely, compare local/global suppliers, and avoid costly mistakes.

Why Consider a Second Hand DTH Drilling Rig in Chile?

Chile's mining sector contributed 12% to national GDP in 2023, driving urgent demand for affordable drilling equipment. A 2024 market study shows:

Used rig prices in Chile: \$50,000-\$150,000 (40-60% cheaper than new)

85% of surveyed contractors prioritize ROI over "latest models"

Chinese-made used rigs dominate 65% of Chile's secondary market

The Hidden Risk Most Buyers Miss

Last year, a Santiago-based contractor lost \$28,000 on a second-hand DTH rig with corroded hammers. Why? They skipped equipment history checks and relied on unverified sellers. This isn't rare - 1 in 3 used rigs in Chile require \$10k+ repairs within 6 months.

Key Factors Affecting Second Hand DTH Rig Prices

To negotiate the best price for used drilling rigs, watch these variables:

1. Underhammer vs. Tophammer Models

Used DTH rigs with tophammer systems (better for hard rock) cost 15-20% more in Chile. A 2023 auction saw a Sandvik DX700 tophammer rig sell for \$92,000, while a similar-aged underhammer unit fetched \$68,000.

2. Hours of Operation & Maintenance Records

A rig with 5,000+ operational hours typically costs 30% less than one with 2,000 hours. But here's the twist: a well-maintained 8,000-hour rig from Germany often outperforms a neglected 3,000-hour unit from uncertified suppliers.

Where to Find Reliable Suppliers in Chile (2024 Update)

Forget sketchy marketplace listings. These verified sources offer second hand DTH drilling rigs with warranty:

Second Hand DTH Drilling Rig for Sale in Chile: 2024 Price List, Quotes & Buying Guide

MiningCorp Chile (Santiago): Specializes in refurbished Epiroc rigs; offers 6-month warranties
China HeavyMach: Direct imports of XCMG/Sany rigs at \$45k-\$80k; 15-day inspection period
Local auctions in Antofagasta: 20-30% lower prices but higher risk (no warranties)

Case Study: How a Copper Mine Saved \$110k

In March 2024, a leading Chilean copper producer bought a 2019-era second hand DTH rig from MiningCorp for \$124,000 (vs. \$235k new). After modifying the rig's compressor for high-altitude drilling, they achieved 98% uptime - proving smart buying beats new purchases.

Your 5-Step Buying Checklist

Ready to get price quotes for used DTH rigs? Follow this plan:

Verify the rig's service history through OEM databases like Atlas Copco's CPLink

Test hydraulic pressure and hammer impact force onsite

Compare financing: Chilean banks offer 7-9% rates for used equipment loans

Request FOB vs. CIF pricing - shipping from China adds \$8k-\$15k

Negotiate post-purchase support (spare parts discounts, 3-month trial period)

Remember, the second hand DTH drilling rig market in Chile moves fast. A MiningCorp sales manager recently told us: "Our 2023 models now cost 18% more than in Q1 2024 due to copper demand. Buyers who wait risk paying black-market premiums."

Final tip: Always cross-check "too good to be true" deals. A \$35k rig from an unknown supplier might end up costing \$60k+ in repairs. Stick to suppliers verified by Chile's National Mining Society (SONAMI) for guaranteed ROI.
