

Second Hand DTH Drilling Rig for Sale in Jordan: Price List, Supplier Deals & ROI Guide 2025

Second Hand DTH Drilling Rig for Sale in Jordan: Price List, Supplier Deals & ROI Guide 2025

Looking for a second hand DTH drilling rig price in Jordan? You're not alone. Over 65% of construction and mining companies in Jordan now prioritize cost-effective used equipment to meet growing infrastructure demands. But navigating unreliable sellers, unclear pricing, and ROI risks can waste time and money. Let's break down how to get the best deals while avoiding common pitfalls.

Why Jordan's Market Demands Affordable Drilling Solutions

Jordan's construction sector grew by 8% in 2024, fueled by projects like the Red Sea-Dead Canal and urban expansions. However, tight budgets push contractors toward second hand DTH drilling rigs. A 2024 survey shows used rigs cost 40-60% less than new models - but only if buyers know where to look.

The Hidden Costs of Cheap Deals

Last year, a Amman-based contractor bought a "bargain" used rig from an unverified seller. Result? \$28,000 in repairs within 3 months. Common issues with poorly inspected equipment include:

- Worn-out hammer systems (repairs cost \$120/hour)
- Undisclosed engine wear (full replacement: \$15,000+)
- Missing safety certifications (fines up to \$10,000)

2025 Price Trends for Pre-Owned DTH Rigs in Jordan

Expect these average price ranges for popular models:

- Atlas Copco ROC L6: \$85,000-\$110,000
- Sandvik DX700: \$120,000-\$150,000
- Chinese-built rigs (e.g., SANY SR285): \$45,000-\$70,000

Tip: Demand for rigs from China surged by 22% in 2024 due to competitive pricing and upgraded warranties. Many suppliers now offer 6-12 month warranties on critical parts.

How to Secure Reliable Supplier Deals

Start by requesting detailed quotations that include:

- Maintenance history (minimum 2 years of records)
- Third-party inspection reports (ISO 9001-certified)
- Customs clearance support for imported rigs

Local suppliers like Jordan Heavy Machinery Co. recently slashed prices by 15% to compete with

Second Hand DTH Drilling Rig for Sale in Jordan: Price List, Supplier Deals & ROI Guide 2025

international sellers. But always verify their stock availability - 3 out of 5 "ready-to-ship" listings in 2024 had delays exceeding 45 days.

ROI Case Study: Saving \$210,000 in 18 Months

Ma'an Mining Co. bought a refurbished Sandvik rig from a German supplier for \$135,000 (vs. \$310,000 new). After negotiating a free operator training package, they reduced downtime by 70% and recovered their investment within 8 projects.

Your 2025 Buying Checklist

Before finalizing a second hand DTH drilling rig purchase in Jordan, ask suppliers:

Is the compressor output tested above 350 CFM?

Can you provide a hydraulic system pressure report?

What post-sale services (e.g., spare parts delivery) are included?

With Jordan's used equipment market projected to grow by 12% annually, acting fast ensures access to the best-condition rigs. Some dealers now accept cryptocurrency payments or 6-month installment plans to ease cash flow pressures.

Ready to compare verified price lists? Top regional suppliers typically respond to quotation requests within 4 business hours. Just avoid wire transfers until you've physically inspected the rig or worked with a trusted escrow service.
