

# Second Hand DTH Drilling Rig for Sale in Nigeria: Price List, ROI & 2025 Supplier Deals

Second Hand DTH Drilling Rig for Sale in Nigeria: Price List, ROI & 2025 Supplier Deals

Looking for second hand DTH drilling rig prices in Nigeria? You're not alone. Over 72% of mining contractors here prefer used equipment to cut startup costs. But how do you avoid scams, calculate ROI, and find genuine sellers? Let's break this down.

## Why Used DTH Rigs Dominate Nigeria's Market

A new DTH rig costs \$180,000-\$450,000. For small-scale miners and drilling startups, that's a dealbreaker. Here's the smart move: second-hand models from China or Germany often sell for 40-60% less. Take Lagos-based DrillMasters Ltd. - they bought a 2019 Sandvik rig through a Dubai supplier for \$92,000, saving 53% vs new.

## Price Check: What to Expect in 2025

Small rigs (100-150mm bore): \$28,000-\$45,000

Mid-size (200-250mm): \$61,000-\$85,000

Heavy-duty (300mm+): \$110,000-\$165,000

Watch out - 2024's mining boom pushed Nigeria's used equipment demand up 31% (Q1 data from Proshare Research). Prices might climb 8-12% by Q3 2025.

## 3 Steps to Avoid Costly Mistakes

**Problem:** Fraudulent sellers modify hour meters on rigs. **Agitate:** You could lose \$20k+ on a machine needing immediate repairs. **Solve:**

Demand OEM service records (Check for Schramm or Atlas Copco certification)

Test hydraulic pressure at 250 bar minimum

Verify customs papers through NCS's single window portal

## Where to Get Reliable Quotations

Top suppliers like Sinotruk (China) and Bauer Equipment (Germany) now offer online price calculators for Nigeria-bound gear. For example:

? A 2017 Schramm T685WS with 4,200hrs: \$78,500

? 2020 XCMG XSL200: \$103,900 (includes 1-year hydraulic warranty)

**Bonus:** The Nigerian government's 5% tax rebate for mining equipment imports applies to used rigs until Dec 2026.

## ROI Tip From the Field

## **Second Hand DTH Drilling Rig for Sale in Nigeria: Price List, ROI & 2025 Supplier Deals**

Abuja contractor Musa Adekunle made 140M NGN in 12 months using a second-hand DTH rig bought for \$65k. His secret? Focus on rigs with modular designs - replaced just the compressor (\$8k) instead of buying new (\$32k+).

Ready to compare prices per piece? Contact certified suppliers through the Nigeria Mining Association's verified partner list. Always request FOB and CIF quotes - shipping from China adds \$7k-\$14k, but some EU suppliers include customs clearance.
