

Second Hand DTH Drilling Rig for Sale in Spain 2024: Price List, Quotation & ROI Guide

Second Hand DTH Drilling Rig for Sale in Spain 2024: Price List, Quotation & ROI Guide

Looking to buy a second hand DTH drilling rig in Spain without breaking the bank? You're not alone. Over 60% of mining and construction companies in Southern Europe now opt for pre-owned equipment to cut costs. But here's the problem: prices vary wildly, and unreliable sellers often hide mechanical flaws. Let's break down actual price ranges, trusted suppliers, and smart strategies to get the best ROI on your purchase.

Current Market Prices for Used DTH Rigs in Spain

The average second hand DTH drilling rig price in Spain ranges from EUR50,000 to EUR150,000 depending on three factors:

- Age (3-8 years old models dominate the market)
- Brand (Sandvik and Atlas Copco units cost 20% more than Chinese rigs)
- Drill depth capacity (300-500m models are most in demand)

Real-World Case: How a Madrid Contractor Saved 45%

GranVia Construcciones bought a 2019 Sandvik DX700 rig for EUR82,000 last month - 53% cheaper than new. They used our buying guide checklist to verify hydraulic systems and hammer functionality. "We compared quotations from 6 suppliers across Spain and Germany," says site manager Carlos Mendez. Result? A rig that's already drilling 12 hours/day at their copper exploration site.

3 Red Flags When Buying Used Drilling Rigs

Spanish equipment dealers reported a 33% spike in defective rig sales post-COVID. Watch out for:

- Unverifiable service histories (demand OEM maintenance records)
- Hidden corrosion in feed beams and carriages
- Outdated air compressor specs failing new EU emissions rules

Where to Find Reliable Suppliers

Top platforms offering price per piece transparency include:

- MachineryZone Spain (lists 15+ verified DTH rigs weekly)
- Euro Auctions Barcelona (live inspections available)
- German exporters like Bauer Equipment (offer EU-wide warranties)

Pro Tip: Always Request On-Site Testing

Second Hand DTH Drilling Rig for Sale in Spain 2024: Price List, Quotation & ROI Guide

Andalucia-based driller Lucia Torres advises: "We test each rig's rotation speed and dust suppression system using actual rock samples. Last year, this saved us from buying a EUR68,000 rig that couldn't handle granite." Many sellers now include 48-hour demo periods in their supplier deals.

With Spain's construction sector projected to grow 4.2% in 2024, smart buyers are snapping up quality used rigs. Compare price lists from at least three regions - German exporters often undercut local Spanish prices by 8-12% for identical models. Need a customized quotation? Contact verified dealers through the European Used Heavy Machinery Association portal for tax-compliant deals.
