

# Second Hand Drilling Bit Price in Israel 2025: Cost List, Quotation & Supplier Guide

## Second Hand Drilling Bit Price in Israel 2025: Cost List, Quotation & Supplier Guide

Need affordable drilling tools for oil, water, or mining projects in Israel? Rising equipment costs are squeezing margins - second hand drilling bits can slash expenses by 30-60%. But where do you find reliable suppliers and verify fair prices per piece? This guide gives verified 2025 market data to help you buy smart.

### Why Second Hand Drilling Bits Are Surging in Israel

Over 65% of Israeli drilling contractors now use refurbished bits, reports Tel Aviv's Mining Equipment Association (2024). Why? A new PDC bit costs \$800-\$1,200+ from German or U.S. brands. Meanwhile, tested used drilling bits sell for \$300-\$600 with 80-90% lifespan remaining.

### Case Study: Haifa Drilling Co. Cuts Costs by 44%

One Israeli company saved \$18,000 monthly by switching to China-sourced second hand bits for shale gas projects. "We compared 6 suppliers' price lists and quality reports before choosing," says project manager David Levi. "The ROI was clear within two months."

### 2025 Price Trends: What to Expect

Used bit costs in Israel fluctuate based on:

- Bit type (PDC, roller cone, diamond-impregnated)
- Original manufacturer (Baker Hughes, Schlumberger, etc.)
- Remaining usable depth (3,000m vs. 8,000m capacity)

Current average price per piece ranges:

- Standard PDC bits: \$280-\$520
- High-torque diamond bits: \$650-\$950
- Full refurbished sets (6-8 pieces): \$2,100-\$4,800

### How to Get the Best Quotation in Israel

Top suppliers like DrillTech Global and EcoDrill Solutions offer free inspections and warranty programs. Always request:

- Third-party wear analysis reports
- Supplier's repair/replacement policy
- Total landed cost including shipping from China/Europe

## Second Hand Drilling Bit Price in Israel 2025: Cost List, Quotation & Supplier Guide

Shimon Tahan, a Eilat-based drilling consultant, advises: "Compare at least 3 price quotations. Cheapest isn't best - check if customs duties are included. Many buyers get stuck with 17% VAT surprises."

### 2025 Market Alert: New Import Rules

Israel now requires ISO 9001 certification for all used drilling equipment imports. Partner with suppliers who handle compliance paperwork. This avoids 2-3 week customs delays common since March 2024.

### Where to Find Trusted Wholesale Deals

While local dealers offer quick delivery, importing directly from Turkey or China saves 12-18%. Key portals:

Made-in-China (pre-vetted suppliers)

Machinio's Middle East hub

Israel Equipment Trader Facebook groups

"We bought 28 used bits from a Shenzhen supplier last quarter," says Rina Cohen of Desert Drilling Ltd. "Their wholesale guide helped us negotiate bulk pricing - \$389 per piece instead of \$465."

Smart buyers combine quality checks with smart sourcing. With rising competition in Israel's energy sector, every shekel saved on second hand drilling bit prices boosts your project's bottom line.
