

Second Hand Drilling Rod Price in China 2025: Cost Per Piece, Supplier List & ROI Guide

Second Hand Drilling Rod Price in China 2025: Cost Per Piece, Supplier List & ROI Guide

Why Buy Used Drilling Rods in China Now?

If you're mining or drilling on a budget, second hand drilling rod prices in China could save you 40-60% versus new equipment. Last year, over 12,000 tons of used drilling tools were exported from China to countries like Australia, Nigeria, and Germany. But here's the catch: prices vary wildly based on condition and supplier reliability.

The Hidden Costs of Cheap Deals

A Kenyan contractor bought 80 "Grade A" rods from an online vendor in 2023. Six months later, 32 rods snapped due to undisclosed corrosion. Average repair costs? \$18,000 + project delays. That's why smart buyers focus on verified suppliers and certified quality checks - not just the lowest price per piece.

2025 Price Trends & Market Data

China's used drilling rod market grew 23% in 2024, driven by:

- Mining sector demand in Africa/Southeast Asia
- Stricter EU/US environmental rules pushing reuse
- Local govt subsidies for industrial recycling hubs

Current average costs (FOB China):

- Threaded rods (3m): \$80-\$220 per piece
- Hex rods (used
