

Second Hand Drilling Rod Price in Indonesia: 2024 Cost List, Supplier Quotes & ROI Guide

Second Hand Drilling Rod Price in Indonesia: 2024 Cost List, Supplier Quotes & ROI Guide

Why Second Hand Drilling Rod Prices Are Surging in Indonesia?

If you're in construction or mining, you've likely noticed second hand drilling rod prices climbing across Indonesia. Jakarta-based contractors report 18% price hikes since 2023 due to surging demand from nickel mining projects. A recent survey shows 63% of small-scale drill operators now actively seek used equipment to cut costs.

The Real Cost of Cheap Options

A Kalimantan contractor learned this the hard way. They bought "bargain" used drilling rods at Rs8,500,000 (\$550) per piece last year. Three months later, 40% failed during a geothermal project - costing Rs220 million (\$14,200) in downtime. Quality matters.

2024 Price Benchmarks for Smart Buyers

Current second hand drilling rod prices in Indonesia range from:

Rs12-18 million (\$775-\$1,165) per piece for quality EU/Germany-made rods

Rs6.5-9 million (\$420-\$580) for Chinese surplus stock

Rs4-6 million (\$260-\$390) for local refurbished units

*Prices exclude 11% VAT and import duties (reduced to 5% under new 2024 mining equipment regulations).

Supplier Secrets Revealed

Top Surabaya dealer PT Tambang Baru sells German used drilling rods at Rs15.9 million (\$1,030) with 6-month warranties. Meanwhile, China's Sinorock offers bulk deals - 10 rods for Rs68 million (\$4,400), nearly 20% cheaper than 2023 quotes. Always request material certificates and torque test reports.

Your 3-Step Buying Checklist

Verify wear patterns: Measure thread diameter tolerance (should be $\leq 0.3\text{mm}$)

Compare price per piece + shipping: Balikpapan port charges Rs850,000 (\$55) handling fee

Ask about trade-ins: 70% of Java suppliers now accept old rods as partial payment

With Indonesia's nickel output projected to grow 22% in 2024 (Ministry of Energy data), smart equipment choices separate profitable operations from money pits. Remember: A Rs18 million German rod lasting 3,000 hours delivers better ROI than 4x Rs4.5 million rods needing replacement every 500 hours.

Start contacting suppliers this week - multiple dealers confirmed second hand drilling rod stocks will drop
