

Second Hand Drilling Rod for Sale in Jordan: 2024 Price List, Supplier Quotes & Wholesale Deals

Second Hand Drilling Rod for Sale in Jordan: 2024 Price List, Supplier Quotes & Wholesale Deals

Looking to buy second-hand drilling rods in Jordan? You're not alone. Construction companies and contractors across Amman, Aqaba, and Irbid are turning to used drilling equipment to cut costs while maintaining productivity. But how much should you pay? Let's break down the price per piece, compare suppliers, and reveal how to get the best quotation for your project.

Why Second Hand Drilling Rod Prices in Jordan Are Surging

Jordan's construction boom - fueled by \$2.3 billion in infrastructure projects - has created a 40% spike in demand for affordable drilling tools since 2022. New rods from China or Germany can cost \$800-\$1,200 per unit. But savvy buyers are snagging used drilling rods for 50-70% less. Sounds perfect? There's a catch: Many get scammed by unverified sellers offering rusted or mismatched pieces.

Case Study: Al-Hussein Constructions Saved 62%

This Amman-based contractor needed 120 rods for a solar farm project. New rods would've cost \$96,000. Instead, they bought certified second-hand rods through a UAE-based supplier for \$36,500 - with a 6-month warranty. Key takeaway? Working with verified wholesalers pays.

2024 Price Guide for Used Drilling Rods in Jordan

Current price ranges (FOB Aqaba Port):

- Standard 3-meter rods: \$180-\$320 per piece
- Hardened alloy rods: \$400-\$550 per piece
- Full sets (10+ rods): 12-18% wholesale discount

Watch out: Jordan's Customs Authority reports 23% of used drilling tools imported in 2023 failed quality checks. Always request third-party inspection reports.

How to Buy Smart: 3 Steps to Secure the Best Deal

- Problem: Most online quotes hide transport/duty costs.
- Agitate: That "\$200 rod" could become \$380 after surprises.
- Solve: Use this checklist:

- Ask suppliers for CIF Aqaba pricing (includes shipping/insurance)
- Verify certification (ISO 9001 or JISM compliance)
- Compare at least 3 quotations - Chinese suppliers often beat Turkish ones by 15%

GCC Used Tools: Specializes in EU-sourced rods with corrosion warranties

Need a personalized buying guide? Contact Jordan's Construction Materials Association for their updated supplier blacklist/whitelist - updated monthly since April 2024.

The ROI Calculation You Can't Ignore

A typical water well drilling project near Zarqa requires 80 rods. New set: \$76,000 vs used: \$28,800. Even with 10% replacement rate, you save \$39,680. That's enough to hire two extra operators for six months. Still thinking about new equipment?

As Jordan's Ministry of Energy pushes for 200 new artesian wells by 2025, the demand for cost-effective drilling rods will only grow. Smart buyers are already stockpiling quality used inventory before summer's price hikes. What's your move?
