

# Second Hand Engineering Drilling Rig for Sale in Mexico: 2024 Price List, ROI & Supplier Deals

Second Hand Engineering Drilling Rig for Sale in Mexico: 2024 Price List, ROI & Supplier Deals

## Why Buy a Used Engineering Drilling Rig in Mexico?

Looking for second hand engineering drilling rigs in Mexico? You're not alone. Construction firms and contractors across Mexico City, Monterrey, and Guadalajara are turning to pre-owned rigs to cut costs. New rigs can cost \$150,000-\$500,000 USD, but used models sell for 30%-60% less. With Mexico's infrastructure projects booming - including the Maya Train and new highways - smart buyers want ROI-focused solutions without breaking the bank.

## The Problem: Hidden Costs and Reliability Risks

Many hesitate to buy used rigs due to wear-and-tear fears. A 2023 survey shows 68% of Mexican buyers worry about hidden repair costs or outdated specs. One mining company in Sonora lost \$25,000 USD fixing hydraulic leaks on a poorly inspected rig. But here's the twist: most risks can be avoided.

## 2024 Price Trends for Second Hand Rigs in Mexico

Here's what's driving price per piece changes this year:

- Popular models: Used Sandvik DX700 rigs now cost \$85,000-\$120,000 USD (down 12% since 2022)
- Chinese brands like SANY and XCMG dominate the budget market at \$45,000-\$70,000 USD
- U.S.-imported rigs face 18% tariffs, but local dealers offer tax-inclusive quotations

## Case Study: How a Monterrey Contractor Saved 40%

Compania Constructora Mexicana bought a 2018 Atlas Copco FlexiROC T15 rig for \$92,000 USD (original price: \$220,000). Key steps they took:

- Verified hour meter readings with OEM service records
- Negotiated a wholesale discount for 2 rigs + spare parts
- Chose a Mexico-based German supplier for warranty coverage

Result: ROI achieved in 14 months instead of 3+ years for new equipment.

## Where to Find Reliable Suppliers & Deals

Three trusted channels for second hand engineering drilling rigs in Mexico:

- Local Auctions: Focus on industrial hubs like Queretaro - average prices 15% below market
- Cross-Border Sellers: U.S. and China exporters now offer Mexico-specific price lists with shipping included
- Certified Resellers: Companies like Maqpower and Grupo Lander provide refurbished rigs with 6-12 month

warranties

Quick Buying Guide: 4 Non-Negotiables

Before requesting a quotation, check these specs:

1. Engine hours (aim for under 6,000 hrs)
2. Compatibility with Mexico's soil types - volcanic rock in Jalisco requires  $\geq 350$  kN pull force
3. Availability of spare parts from local distributors
4. Compliance with NOM-003-SCT-2024 safety standards

With Mexico's construction sector growing at 4.7% annually (INEGI data), timing matters. Whether you need a rig for geothermal drilling in Baja or subway expansions in CDMX, compare supplier deals now. Ready to explore options? Download our 2024 Used Rig ROI Calculator from the link below.
