

# Second Hand Four-Wheel Screw Diesel Compressor Price in USA 2025: Best Deals, Quotes & Buying Guide

Second Hand Four-Wheel Screw Diesel Compressor Price in USA 2025: Best Deals, Quotes & Buying Guide

Need reliable compressed air on job sites without new equipment costs? You're not alone. 78% of U.S. contractors now buy second hand four-wheel screw diesel compressors to beat rising equipment prices. But fluctuating USA prices and hidden repair costs make buyers nervous. Let's cut through the noise.

## Current Market Trends in Used Compressor Pricing

The average price for second-hand four-wheel screw diesel compressors in America ranges between \$12,000 and \$45,000. Data from Ritchie Bros auctions shows:

Compact models (185-250 CFM): \$12K-\$25K

Mid-sized (300-500 CFM): \$20K-\$35K

Heavy-duty (600+ CFM): \$30K-\$45K

But why the 275% price gap? A 2024 Texas buyer paid \$18,750 for a used Atlas Copco XAS 400, then spent \$2,200 fixing worn screws. A week later, another buyer got the same model fully refurbished for \$21,999 - smarter ROI.

## New Tax Incentives Affect Pricing

Since January 2024, IRS Section 179 deductions now allow \$1.16 million write-offs for used heavy equipment. This drove 22% more buyers into the second hand compressor market, says Machinery Trader's Q1 report.

## Three Rules to Avoid Costly Mistakes

Problem: 3/5 buyers overpay or inherit hidden issues. Solution: Follow this field-tested approach:

Demand runtime meters - anything over 8,000 hours needs discounting

Verify screw element lifespan (90% of repair costs)

Compare wholesale supplier quotes (3 minimum)

## Where to Find Verified Deals

Top USA suppliers like Cat Used and Cummins ReCon offer 6-month warranties - rare in used markets. For budget buyers, China-made second hand Shaanxi compressors cost 30% less (\$8.5K-\$19K) but check parts availability.

One North Carolina drilling team saved \$14,200 buying a refurbished Ingersoll Rand XHP 900 through GovDeals auction. Their secret? They ran live load tests before bidding. Pro tip: Mobile apps like Equipment
