

Second Hand Piston Diesel Air Compressor Price in Singapore 2024: Cost, Quotation & Buying Guide

Second Hand Piston Diesel Air Compressor Price in Singapore 2024: Cost, Quotation & Buying Guide

Looking for the best deals on a second hand piston diesel air compressor in Singapore? You're not alone. With construction projects booming and industrial demand rising, many businesses want reliable equipment without breaking the bank. But finding trustworthy sellers, competitive prices, and clear ROI calculations can feel overwhelming. Let's simplify your search.

Why Singapore Businesses Choose Used Piston Diesel Compressors

New piston compressors from brands like Atlas Copco or Ingersoll Rand cost S\$8,000-S\$25,000+. For SMEs, that's a huge upfront investment. Meanwhile, second-hand models in Singapore sell for 30-60% less - around S\$3,500-S\$12,000 depending on specs. With proper maintenance, these machines deliver 5-8 years of service, making them ideal for short-term projects or backup systems.

Market Trends & Pricing Factors

Singapore's push for sustainable manufacturing (like the Sustainability Reporting Programme) has increased demand for refurbished equipment. Popular models like the Chicago Pneumatic PDS 185 or Kaeser D30 dominate listings. Key factors affecting price per piece:

- Age: Units under 5 years old cost 20% more
- Power output: 10-30 HP models are most sought-after
- Supplier reputation: Certified dealers charge 10-15% premium

Where to Find Reliable Suppliers

Avoid scams by working with verified sellers. For example:

- GES Singapore: Offers 6-month warranties on rebuilt compressors (avg. price: S\$6,200)
- China Machinery Hub: Imports low-cost units from Guangdong factories (from S\$3,800)

Always request a quotation with breakdowns for parts like cylinders, valves, and air filters. Check if transport fees (S\$200-S\$500) are included.

Case Study: Reducing Costs for a Woodworking Factory

Second Hand Piston Diesel Air Compressor Price in Singapore 2024: Cost, Quotation & Buying Guide

A Jurong-based workshop saved S\$14,000 by buying two used piston diesel compressors (2019 model) instead of new units. After 18 months, ROI hit 78% through reduced downtime and energy bills. Maintenance? Just S\$320/year for oil changes and belt inspections.

3 Tips to Buy Smarter in 2024

1. Compare price lists from at least 3 sellers - prices vary wildly
2. Test run the compressor for air leaks or irregular vibrations
3. Ask about after-sales support - 65% of buyers regret ignoring this

Most suppliers offer WhatsApp or Telegram support for instant wholesale deals. Need financing? DBS and UOB provide equipment loans at 4.5-6% interest for used machinery.

Ready to explore options? Contact GSE Machinery or check local listings on Carousell for same-day purchases. With diesel prices stable and a 15% GST hike coming in 2025, buying now locks in your savings.
