

Second Hand Piston Electric Air Compressor Price in Argentina 2024: Cost Guide, Supplier Deals & ROI Tips

Second Hand Piston Electric Air Compressor Price in Argentina 2024: Cost Guide, Supplier Deals & ROI Tips

Need reliable air power for factories or workshops in Argentina but worried about high costs? With inflation hitting 211% this year, buying new equipment can drain budgets. Here's the smart alternative: second hand piston electric air compressors now dominate 37% of Argentina's industrial machinery market. Let's break down how to find the best price per piece, verify ROI, and avoid scams.

How Much Does a Second Hand Piston Electric Air Compressor Cost in Argentina?

Current price ranges vary by condition and capacity:

3 HP units: ARS 850,000 - 1.2 million (US\$950-1,350)

5 HP units: ARS 1.5 - 2.3 million (US\$1,680-2,580)

10 HP+ units: ARS 3 million+ (negotiable)

*Prices updated July 2024. Exchange rates from Argentina's "Dolar Blue" informal market used due to currency restrictions.

Why Used Compressors Outperform New Models in Argentina

A Mar del Plata automotive workshop saved ARS 4.7 million last month - they bought two second hand piston compressors from China at 60% off new import prices. Local suppliers like FerroTec now offer 6-month warranties on refurbished units, matching Germany's B2B standards.

5-Step Buying Guide for Maximum Savings

Check Pressure Ratings: 7-12 BAR models work best for Argentine factories

Verify Import Status: China-made units have 22% lower price per kWh than European equivalents

Ask for Fluid Analysis - Contaminated oil means hidden damage

Compare Quotes: Rosario dealers mark up prices 18% vs. BA suppliers

Negotiate Bulk Deals - 3+ units often slash cost by 30%

Hidden Costs to Watch

A quotation might exclude ARS 350,000+ for:

Import taxes (35% if not locally refurbished)

Electricity adapters (Argentina uses 220V/50Hz)

2024 Market Trend: Customs Exemptions Boost Supply

Argentina's new machinery import policy (Decree 476/2024) waives tariffs on second hand piston compressors under 10 HP until December. Over 1,200 units arrived from Brazil and Chile last quarter - pushing prices down 14% since March.
