

# Second Hand Piston Electric Air Compressor Price in Pakistan 2025: Updated Cost, Quotation & Supplier Deals

Second Hand Piston Electric Air Compressor Price in Pakistan 2025: Updated Cost, Quotation & Supplier Deals

Looking for second hand piston electric air compressor price in Pakistan? You're not alone. Over 67% of small factories in Lahore and Karachi now opt for used compressors to cut costs. Let's break down real market prices, trusted suppliers, and ROI tips for smart buyers.

## Why Second Hand Compressors Dominate Pakistan's Market

New piston compressors from China or Germany cost PKR 250,000+ - but used models sell for PKR 45,000-120,000. Take Faisalabad's textile hub: 8/10 workshops use refurbished units to stay competitive. But beware! Some sellers inflate price per piece by 40% for "European imports".

## Real Price List for 2025 (Karachi Market Verified)

- 3 HP Used Piston Compressor: PKR 52,000-65,000
- 5 HP German-Refurbished Unit: PKR 98,000-112,000
- 7.5 HP Industrial Grade with 6-Month Warranty: PKR 135,000-160,000

## How to Avoid Scams: 3 Steps

Last month, a Rawalpindi buyer paid PKR 80,000 for a compressor that died in 2 weeks. Follow this buying guide to protect yourself:

- Check oil leaks and belt tension - sellers often hide wear
- Demand test reports (airflow  $\geq$  12 CFM at 90 PSI)
- Verify supplier certifications - ISI Mark or PEC-approved dealers

## Secret Supplier Deals in Lahore & Faisalabad

Top-rated vendors like PakMachineryHub offer wholesale discounts on 5+ units. For urgent needs, check Sialkot's used tool markets every Friday. Pro tip: Ask for quotation comparisons between Chinese-made (lower cost) vs Japanese-refurbished (longer lifespan).

## What Global Trends Mean for You

China's used machinery exports to Pakistan rose 30% since 2023, pushing price lists down. But with new import taxes coming in July 2025, now's the time to buy. A Karachi auto parts factory saved PKR 2.1 million yearly by switching to 10 used compressors. Could your business do the same?
