

# Second Hand Piston Electric Air Compressor Prices in Malaysia 2024: Cost, Quotation & Supplier Deals

Second Hand Piston Electric Air Compressor Prices in Malaysia 2024: Cost, Quotation & Supplier Deals

Need a second hand piston electric air compressor in Malaysia but worried about costs? You're not alone. Over 60% of industrial buyers search for affordable used compressors annually. Prices range from RM 1,500 to RM 8,000 - but how do you find reliable deals without getting scammed?

## Why Used Compressors Save Money (With Proof)

New piston compressors cost 3-4x more than second-hand models. A 2023 study showed Malaysian factories saved RM 12,000/year using refurbished units from certified suppliers. The catch? Only 20% of used equipment sellers provide proper maintenance records.

## Real Price List: What You'll Pay in 2024

3HP models: RM 1,800-RM 3,200

5HP units: RM 3,500-RM 5,700

10HP systems: RM 6,900-RM 11,000

Prices depend on hours used - a Johor supplier recently sold a low-usage 5HP compressor for RM 4,200 with 1-year warranty.

## 3-Step Buying Guide for Safe Deals

Chinese-made compressors now dominate 70% of Malaysia's used market. Follow this process:

Verify tank pressure ratings match your needs (usually 8-12 bar)

Check oil contamination levels - repairs cost RM 400-RM 1,200

Confirm seller certifications (ISO 1217 standards preferred)

## How Suppliers Like ABC Machinery Cut Costs

Klang Valley's top-rated vendor offers trade-in programs. Clients report 18-month ROI on piston electric compressors. Their secret? Post-purchase maintenance packages at RM 150/month.

Need customized quotes? Most suppliers respond within 2 hours. One Penang factory got 3 competing quotes via WhatsApp - saved 22% on a 10HP unit. Prices might rise 5-8% by Q3 2024 due to increased scrap metal tariffs. Now's the time to compare second hand air compressor deals while stock lasts.
