

Second Hand Rock Drill Price in South Korea: 2024 Cost, Quotation & Buying Guide

Second Hand Rock Drill Price in South Korea: 2024 Cost, Quotation & Buying Guide

Need reliable rock drilling equipment without breaking the bank? Second-hand rock drill prices in South Korea dropped 12-18% since 2023, making this the best time to upgrade your fleet. But where do you start?

Why Korea's Used Rock Drill Market Boomed in 2024?

Over 40% of construction firms now buy pre-owned drills - and here's why:

New drill costs: KRW85-120 million vs. used: KRW28-60 million

7-year government tax cuts for sustainable construction practices

Chinese manufacturers like SANY and XCMG flooding the market

Case Study: Daejeon Tunnel Project Saved KRW210M

A local contractor bought 3 used Furukawa HC150 rock drills from Busan suppliers at KRW43M each. Compared to new German models (KRW97M+), they achieved ROI in 8 months through three back-to-back contracts.
