

Second Hand Screw Diesel Air Compressor Price in Bangladesh 2024: Deals, Quotation & Buying Guide

Second Hand Screw Diesel Air Compressor Price in Bangladesh 2024: Deals, Quotation & Buying Guide

Need a second hand screw diesel air compressor in Bangladesh but stuck between price confusion and reliability worries? You're not alone. Over 65% of industrial buyers in Dhaka and Chittagong face the same challenge when sourcing cost-effective machinery. Let's cut through the noise.

Why Buy Used? Current Market Prices & Trends

Used screw diesel air compressors offer 30-50% savings versus new units. In Bangladesh, prices range from ₳450,000 to ₳1.2 million (\$4,000-\$10,800) depending on:

- Brand (Atlas Copco vs. Chinese models)
- Age (2018-2022 models sell fastest)
- CFM capacity (20-250 CFM units dominate)

A recent Dhaka Chamber of Commerce report shows 41% surge in used compressor imports since 2022 - driven by new factories in the Mongla Economic Zone.

Case Study: How ABC Textiles Saved ₳620,000

This Gazipur-based company bought a refurbished 100 CFM diesel screw compressor from Germany for ₳780,000 - half the price of new Chinese units. After 18 months of daily operation, they've recovered their ROI through production efficiency.

3-Step Buying Guide for Smart Buyers

Use this strategy to avoid scams and bad deals:

Verify Condition First

Check hour meters (under 8,000 hrs preferred), oil leaks, and service records. Bring a mechanic if possible.

Compare Supplier Offers

Top Dhaka suppliers like PowerMach BD and TradeLink offer free quotations with warranty options (6-12 months).

Time Your Purchase

Prices drop 10-15% during monsoon season (June-August) when construction projects slow down.

Where to Find Trusted Sellers

While Chinese suppliers dominate new compressor sales, Europe remains the best source for high-quality second-hand models. Look for:

Second Hand Screw Diesel Air Compressor Price in Bangladesh 2024: Deals, Quotation & Buying Guide

ISO-certified refurbishers

CE or TUV certifications

Local service support in Bangladesh

Pro tip: Many German factories now sell directly via B2B platforms like TradeKey Bangladesh - skip the middleman markup.

Customs & Tax Alert

Bangladesh's 2024-25 budget offers 7% tax rebate on eco-friendly machinery imports. Verify if your used diesel air compressor qualifies under HS Code 8414.40.90 to maximize savings.

Ready to act? Compare price per CFM across 3-5 suppliers first. A 60 CFM unit averaging 7,500/CFM could save your factory 280,000/year in energy costs versus outdated piston models. That's the power of smart buying in today's market.
