

# Second Hand Screw Diesel Air Compressor Price in Canada 2024: Deals, Quotes & ROI Guide

Second Hand Screw Diesel Air Compressor Price in Canada 2024: Deals, Quotes & ROI Guide

## Why Canadian Buyers Hunt Discounted Screw Compressors

Need reliable air power without the price tag of new equipment? Second-hand screw diesel air compressors now drive 30% of industrial projects in Alberta and Quebec. But here's the catch: Used unit prices dropped 8.5% last year (2023 Machinery Market Report), yet many buyers overpay due to hidden costs. A Winnipeg contractor recently spent \$12,000 on a "bargain" compressor - then paid another \$3,200 for engine repairs.

## The Real Cost of Cheap Machines

Three red flags eat into your ROI: Mileage fraud (hour meters reset in 1/4 of used units) Missing emission certifications (new Alberta rules fine \$5k+) Oil leaks requiring 15-40% power loss compensation

## 2024's Smart Buyer Formula

Top suppliers like Toromont and Finning offer verified price lists for 200-750 CFM models. Compare these 2024 ranges:

Atlas Copco XAS 375 KD: \$9,400-\$14,800 (based on 2,000-5,000 service hours) Ingersoll Rand SSRS M115: \$6,900-\$11,200 Chinese-made units (Sinopec, Qingdao): 40% cheaper but 3x warranty claims

## Get Custom Quotes Fast

Ontario's Smith Power Equipment slashed client costs using a 3-step buying guide: Pre-inspect engine hours via CANbus data (not analog meters) Compare price per kWh output over 5 years Demand ISO 1217 volumetric test reports

## Case Study: 73% Savings in BC Logging Camp

A Vancouver Island operation cut costs by importing a used screw diesel compressor from Germany's BAUER Group. Despite \$2,100 shipping fees, their total cost (\$18,700) beat local quotes by \$11,300. Bonus? Germany's TUV-certified machines often include free 6-month parts warranties.

With rising diesel prices, check if suppliers include Tier 4 Final upgrades. Manitoba now offers 15% tax rebates for eco-friendly retrofits - a \$2,250 saving on a \$15k purchase. Ready to negotiate? Always ask for FOB port pricing and 48-hour test runs before finalizing supplier deals.
