

# Second Hand Screw Diesel Air Compressor Price in Peru 2025: Cost, Suppliers & Buying Guide

## Second Hand Screw Diesel Air Compressor Price in Peru 2025: Cost, Suppliers & Buying Guide

### Why Construction Teams Hunt for Affordable Solutions

Peru's mining and construction sectors need cost-effective compressed air solutions. New projects near Lima and Cusco face tight budgets - over 60% of contractors now prefer second-hand screw diesel air compressors to cut upfront costs by 40-60%. But here's the rub: Price listings vary wildly, and unreliable suppliers often push outdated models.

### The Peruvian Market's Hidden Price Trap

A 2024 study revealed that prices for used screw diesel compressors in Peru range from \$8,500 to \$18,000 USD. While China-made units dominate 65% of the market (think brands like Sullair and Atlas Copco), local brokers often add 20-30% markup. Last month, a Cusco-based mining company paid \$14,200 for a 2018 model, only to discover faulty pressure valves during site testing.

### Smart Buying: 3 Steps to Get Fair Quotes

Compare regional suppliers: Top resellers like Maquinarias Peru and GlobalMiner offer price lists with maintenance records

Check import trends: German-made BOGE compressors saw a 15% price drop since 2023 due to surplus EU stock

Verify hourly usage: Screw compressors under 5,000 runtime hours deliver better ROI

### Case Study: How Arequipa Builders Saved 52%

In March 2024, a road construction team sourced a second-hand diesel screw compressor through Lima Machinery Hub. They paid \$11,300 for a 250 CFM unit (originally \$24,000 new) and saved \$6,200 on their project's energy budget. The secret? Negotiating a wholesale deal for two compressors and getting a free 6-month service contract.

### Where to Find Reliable Quotations

Platforms like MercadoLibre Peru list 120+ used screw air compressors monthly, but verified suppliers work better. Heavyequip.pe offers live auction bids starting at \$7,800 USD. For those prioritizing warranty, certified refurbished models from Caterpillar or Ingersoll Rand average \$16,500 - still 35% cheaper than new units.

Local markets: Polvos Rosados in Lima (prices 10-15% lower)

Import options: Chinese suppliers like Shanghai Rich Machinery provide FOB quotes under \$9,000

Lease-to-own programs: Available for projects under 2 years

## **Second Hand Screw Diesel Air Compressor Price in Peru 2025: Cost, Suppliers & Buying Guide**

### **Timing Matters: Seasonal Price Drops Ahead**

Peruvian import taxes drop 8% during Q3 trade fairs. Suppliers like Compresores y Maquinarias S.A.C. plan to clear 2022-2023 stock by October 2025. With Andean mining expansion projects (12% annual growth), negotiating bulk deals now locks in lower rates before demand spikes.

Still unsure? A Lima-based equipment consultant shared this tip: "Always request a trial run and third-party inspection report. A \$300 upfront check prevents \$5,000 repair nightmares."
