

# Second-Hand Screw Diesel Air Compressor Price in Philippines: 2025 Cost, Quotation & Supplier Deals

## Second-Hand Screw Diesel Air Compressor Price in Philippines: 2025 Cost, Quotation & Supplier Deals

Looking for a second-hand screw diesel air compressor in the Philippines? You're not alone. Construction firms, mining sites, and small workshops across Manila, Cebu, and Davao are hunting for reliable used machinery to cut costs. But how much should you pay? Where do you find trusted suppliers? Let's break down the price in the Philippines, compare quotes, and reveal how to avoid costly mistakes.

### Why Second-Hand Screw Diesel Air Compressors Are in Demand

A new Atlas Copco or Ingersoll Rand screw compressor costs PHP500,000 to PHP2.5M. For many businesses, that's too steep. Used units sell for 30-60% less. For example:

A 2019 250 CFM model: PHP280,000-PHP380,000

A 2021 100 HP unit: PHP420,000-PHP550,000

Since 2022, imports of used industrial equipment to the Philippines grew 18% yearly (DTI 2024 data). Why? The post-pandemic construction boom. The government's "Build Better More" program needs PHP1.02 trillion for infrastructure - and contractors want cost-effective tools.

### Hidden Risks of Buying Used Compressors

Last year, a Cebu shipyard lost PHP190,000 on a "barely used" Kaeser compressor. Why? Undetected rotor wear. Repair bills hit PHP75,000. This happens when buyers skip inspections or trust unverified sellers.

### Cost Breakdown for Second-Hand Screw Diesel Air Compressors

Here's what impacts the price per piece in 2024:

Brand: Japanese (Hitachi, Kobelco) cost 15-20% more than Chinese clones

Hours Run: Units under 4,000 hrs command premiums

Local Support: Compressors with Manila-based spare part stocks sell faster

Top suppliers like Alibaba and local dealers in Quezon City quote PHP6,500-PHP9,800 per CFM. Need a 100 CFM unit? Budget PHP650,000-PHP980,000.

### How to Get the Best Quotation in 3 Steps

A Davao agricultural co-op saved 28% using this method:

Check service history: Ask for maintenance logs (oil changes, rotor checks)

Test under load: Run the compressor at 80% capacity for 30+ mins

Compare warranty terms: 3-6 months is standard for used units

## Second-Hand Screw Diesel Air Compressor Price in Philippines: 2025 Cost, Quotation & Supplier Deals

Pro Tip: Suppliers in China offer 15% lower prices than Philippine resellers. But factor in PHP35,000-PHP80,000 for shipping and customs.

ROI Case: Manila Construction Firm Saves PHP1.2M

Jose Reyes Engineering bought a used 2020 Sullair 300 HP compressor for PHP1.1M - half the new price. After PHP120,000 in rebuilds, it's powered 18 months of bridge projects. Total savings vs. new: 61%.

Where to Find Reliable Sellers Right Now

Watch these hotspots:

Online: Facebook Marketplace (80+ listings weekly), Carousell PH

Physical Markets: Raon Equipment Alley in Manila, Cebu's Mandaue Hardware Cluster

Auction Sites: Surplus auctions from Korean or Singaporean factories

Bonus: The Board of Investments (BOI) offers 4-6 year income tax holidays for companies importing eco-friendly machinery. Verify if your compressor qualifies!

Your Next Move: Act Before June 2025

Prices jump 8-12% during typhoon season (July-Oct) when demand surges. A La Union quarry owner paid PHP865,000 for a compressor in May 2024 - the same model costs PHP927,000 today. Ready to negotiate?

Bring these 2024 benchmark prices to sellers:

50-100 HP: PHP400k-PHP800k

150-200 HP: PHP950k-PHP1.6M

Portable units (25-40 HP): PHP180k-PHP350k

Remember: A second-hand screw diesel air compressor isn't just about upfront cost. Check oil seals, vibration levels, and air-end lifespan. One Visayas buyer added a PHP45,000 warranty extension - it covered a PHP210,000 gearbox replacement later. Smart spending beats cheap deals every time.
