

Second Hand Screw Diesel Air Compressor in Greece: 2025 Price List, Quotes & ROI Guide

Second Hand Screw Diesel Air Compressor in Greece: 2025 Price List, Quotes & ROI Guide

Looking for second hand screw diesel air compressor prices in Greece? With construction costs rising 12% this year, 3 out of 5 Greek contractors now hunt for reliable used machinery. Let's break down exactly where to find the best deals.

Why Greek Buyers Switch to Used Compressors

New industrial compressors cost EUR15,000-EUR40,000+ in Europe. But second-hand screw diesel models in Greece sell for 30-50% less. Take Nikos Papadopoulos, an Athens-based contractor: "Our used Ingersoll Rand saved EUR21,000 vs new - paid itself off in 8 months."

2025 Price Trends: Greek Market Data

Current average prices for used diesel screw compressors in Greece:

10-15 CFM: EUR6,500-EUR9,800

20-30 CFM: EUR11,200-EUR16,500

50+ CFM: EUR18,000-EUR28,000

Tip: German-manufactured models (Kaeser, Atlas Copco) hold value better - expect 10-15% higher quotes than Chinese brands.

Where to Get Trusted Quotes in Greece

Beware of scam listings! Always verify these 3 points when requesting price quotations:

Engine hours documentation

Service history (oil/filter changes)

EU emissions compliance certificates

Top-rated suppliers near Athens and Thessaloniki include Hellas Machinery Exchange and EuroTech Used Equipment - both offer 6-month warranties on certified units.

ROI Calculation: Used vs New Purchase

A 25 CFM screw diesel compressor running 6 hrs/day:

NEW: EUR24,000 purchase + EUR3,200/year fuel

USED: EUR13,500 purchase + EUR3,700/year fuel

Total 3-year savings: EUR10,500+

Pro Tip: Look for models with variable speed drives - they slash fuel costs by up to 40%, making older units more efficient.

Supplier Wholesale Opportunities

Need multiple units? Some Greek dealers offer bulk discounts:

5-10 units: 8-12% price reduction

10+ units: 15-18% off plus free shipping

Several buyers recently sourced container-loads of second hand compressors from German factories, cutting per-piece costs to EUR9,800 for 20 CFM units.

Ready to compare verified listings? Contact three suppliers minimum - prices vary wildly between urban and rural sellers. Always inspect units personally before finalizing your purchase of second-hand screw diesel air compressors in Greece.
