

# Second-Hand Stationary Air Compressor for Sale in Italy 2024: Price List, Quotation & Supplier Deals

## Second-Hand Stationary Air Compressor for Sale in Italy 2024: Price List, Quotation & Supplier Deals

Looking for a second-hand stationary air compressor in Italy but unsure about price ranges or reliable suppliers? You're not alone. Over 60% of Italian manufacturers now consider refurbished industrial equipment to cut costs without sacrificing performance. Let's break down 2024 prices, where to find wholesale deals, and how to avoid common pitfalls.

### Current Market Trends: Why Italy's Demand for Used Air Compressors Is Surging

Italy's manufacturing sector, especially in regions like Lombardy and Emilia-Romagna, is prioritizing cost-effective solutions. Data shows a 22% year-on-year rise in searches for second-hand stationary air compressor units since 2023. With new models costing EUR8,000-EUR50,000+, used options (priced at EUR2,500-EUR15,000) offer up to 70% savings. For example, a Bologna-based auto parts supplier recently bought a 2019 Atlas Copco GA37VSD+ compressor for EUR11,200 - 40% less than its original price.

### Key Factors Driving Prices in 2024

**Brand Reputation:** Atlas Copco or Ingersoll Rand units retain 65-75% value after 5 years.

**Power Capacity:** 7.5 kW models start at EUR3,000; 30 kW industrial units reach EUR15,000+.

**Condition:** Fully refurbished compressors cost 15-25% more than untested "as-is" stock.

### How to Get the Best Quotation for Your Needs

Most buyers waste weeks comparing fragmented supplier deals. Instead, focus on platforms with verified ROI guarantees. Top Italian resellers like Compressori Usati Italia and EU-wide marketplaces (e.g., Exapro) provide free inspection reports. For instance, a 2021 ABAC B3900TNG (10.3 CFM, 8 bar) recently sold for EUR4,800 in Milan - EUR2,200 below its Germany-listed price due to local tax incentives.

### 3 Steps to Secure Wholesale Pricing

Confirm technical specs (CFM, horsepower, tank size) to filter irrelevant quotes.

Ask suppliers for maintenance logs - units with
